Domains: Cloudflare, Joker, Namecheap, Traficom

About Me

As a self-taught web developer, I find joy in crafting digital wonders from the depths of my imagination, relishing the art of problem-solving, and ever-in pursuit of ingenious routes to deliver solutions.

I've crafted hundreds of websites and services for clients in Finland and globally, built my own sports and eCommerce platforms, and implemented various REST APIs using Node and PHP.

Also very crafty with frontend frameworks like React, Vue, and SvelteKit.

Professional Experience
